MultiFIX™ INSTRUCTIONS

Use MultiFIX™ with your good fertilizer program.

Apply MultiFIX™ to soil and foliar for Strawberries and Vegetables.

Strawberries - Application Instructions for MultiFIX™

- Good – Apply 3 gallons of MultiFIX per crop season.
- Better– Apply 10 gallons of MultiFIX per crop season.
- Best– Apply 15 gallons of MultiFIX per crop season.

Start with 1 gallon per acre of MultiFIX™ before or at planting.

Apply ½ gallon pre-bloom and ½ gallon per acre every week till end of season.

Vegetables – Most Crops including: Tomatoes, Fava Beans, Sugar Peas, Beets, Watermelons, Broccoli, Cucumbers, Lemon Grass and many other crops.

Improve yield and quality – crops are sweet with more sugar and taste great

Apply Pre-plant then 2 weeks after germination then pre-bloom

- Good – Apply 1 Quart each application as above
- Better –Apply 2 Quarts each application as above
- Best – Apply 4 Quarts each application as above
- Great – Apply 8 Quarts each application as above
