## Vines – Table Grapes | Wine Grapes | Raisin Grapes MultiFIX® - The Optimum Food for Microbes

### Application Guide 1 - 3 gallons per acre every season

Rates are based on crop economics –

Examples:

- A. Our highest rate is 15 Gallons on strawberries throughout 7 month season.
- B. ¼ Gallon for most field crops – corn, wheat, soybeans, rice.

Reasonable expectation of vines crop income - **increases of 4% to 12% using MultiFIX®.**

### Application Rates:

- **Good** – Apply 1 Gallon of MultiFIX® per crop season – Expected 4-8% increase.
- **Better** – Apply 2 Gallons of MultiFIX® per crop season – Expected 6-10% increase.
- **Best** – Apply 3 Gallons of MultiFIX® per crop season – Expected 8-12% increase.

### Application (Beginning Treatment)

Treat vines easily - applying MultiFIX® with irrigation water, herbicide or fertilizers.

Begin- MultiFIX® apply ½ to 1 gallon per acre in the root area of the vines and water in.

### Application Timing at 1 to 3 quarts per application - Double first application

- **Pre-bloom** Winter- helps bloom duration and fruit set.
- **Post fruit set** - helps leaf formation and size – more photosynthesis energy.
- **Mid-Point between fruit set and expected harvest** - helps fruit maturity and size.
- **Post-harvest** - helps tree recover from harvest stress – microbes also work all winter.
- **Additionally foliar** – Apply in tank with other materials – 4 to 6 oz./Acre
